Branding for the
“Modern Gentleman”

Spring 2015
I am extremely fascinated with *branding* and how consumers perceive/interact with the numerous touchpoints of an organization. The goal of this project was to explore my passion for the subject and develop a brand for a timepiece.
Phase 1. Research

To begin this project I need to gain a better understanding of branding, why it is done and how it is done.
What is a brand?

A brand is a **story with a promise**, endorsed and fueled by the consumers.

The process of branding is like **writing a story**, always keeping your audience (customer) in mind.

"Branding is not about getting your target audience to choose you over the competition, but it is about getting your prospects to see you as the ONLY one that provides a SOLUTION to their PROBLEM."

- Laura Lake, Marketing Expert

"Authenticity is doing what you promise, not ‘being who you are’.

- Seth Godin

"A logo is NOT a brand"

Why?

- Differentiation (separate you from competitors)
- Narrative (tell an emotional story)
- Reinforce a good reputation
- Encourage loyalty
- Assure quality
- Target specific market

How?

- Core messages
- Targeted messages
- Look/feel
- Logo

What is a brand?

A combination of methodical examination and strategic imagination... Be creative, be original.

Iterative process seeking to marry the values and key messages with form. The goal is to evoke emotion and express the brand personality.

- Product
- Packaging
- Letterhead
- Business cards
- Store environment
- Website
- Uniforms
- Advertisements

1. Research

Clearly representing/sharing the brand identity, the goal is to inform all stakeholders of the brand and what it stands for.

Understanding the organization, including the company’s mission, vision, target market, culture, competition and future challenges.

3. Identity

Process

2. Strategy

5. Manage Assets

4. Touchpoints

Knowing/understanding who we are

Authenticity starts here

Inspiration
The Pertempo brand is inspired by the unpretentious personality of Napoleon- Philip John DeNardo, a proper gentlemen with an understated elegance.

Philip takes a genuine interest in helping those in need. He was the captain of a volunteer EMT team and served in the military for a number of years. It was times like these that were most rewarding to him. In short, Phil has dedicated the majority of his life to helping others and putting those in need before himself; he’s a selfless guy who leads a life of perfect example.

Phil doesn’t just represent himself, but he epitomizes an overarching generation of traditional, pragmatic people that has been lost in today’s culture. It’s time to bring that back. It’s time for the modern gentlemen. It’s time for Pertempo.
Phase 2. Brand Development

Once I understood branding I created a potential user persona as a starting point.
Target market/Persona

Jack

- Aesthetic driven
- Traditional ways
- Practical
- Adventurous
Nino was my grandfather's nickname as a child and although it means "God is gracious" in Italian it also means "little boy" in Spanish. So I changed it to just "Pertempo," which is a made up word combining "per" and "tempo" meaning "for the time."
A classic, contemporary company, that provides lasting timepieces. We craft clean elegant watches to assist the modern gentleman... and we have fun doing it!
There are two primary typefaces in Pertempo’s identity system: Josefin Slab and Source Sans Pro. Josefin Slab should be used for header text while Source Sans Pro should be left for body text. Both were chosen to fit the brand’s fun, classy, yet honest personality, complementing one another on the page.

Pertempo colors should only be used according to the parameters outlined on this page, including exact CMYK/ RGB color codes, no tints or shades should deviate from what is provided in this guideline.

Stacked
Pertempo’s official logo. “Watch Company” should always be highlighted in the opposite color from “Pertempo,” whether it be black or white.

Simple Solo
This logo should always be used on the face of the watch or in any occasion when “Watch Company” is reduced to small for legibility.

Wristwatch/ pocket watch combo
**Wear it like a Wristwatch**

1. Pull button end (face up) through bottom bracket.
2. Pull button through top bracket (leave slack for wrist to fit through).
3. Loop back around and pull button through the metal ring.
4. Choose the button slot that fits your wrist best.

**Wear it like a Pocket watch**

1. Pull button end (face up) through top bracket.
2. Loop button through metal ring at the end of the strap.
3. Pull button tight leaving a loop around the bracket on the watch casing.
4. Loop around belt loop then attach button to preferred slot.

A simple box made from a non-invasive material that can be easily disposed of after purchase. The box carries the watch casing, the watch strap and a wallet size ID card explaining how to use the strap in the two ways it was designed for.
Phase 5: Advertisement
PER TEMPO

TIME FOR YOU
I wanted my thesis to essentially feel like the launch of a company so I designed an advertisement you might see in a magazine or a billboard. By using the white face on the black background I accentuated the watch so it dominates the page. I decided to add a little interest with a subtle “in context” photograph of the modern gentleman engaging with the product. Overall keeping it simple and to the point, focusing on the product and what sets it aside from every other timepiece was my primary concern.
